AMENDMENTS TO THE CLAIMS

- (Canceled)
- 2. (Currently Amended) A method for use in verification of a device comprising: providing a plurality of packet classes;
- providing a <u>single</u> flag, which may be of a first or a second state, for each of the plurality of packet classes;

generating a packet;

- if the <u>single</u> flag of the packet class of the generated packet is in the first state, testing the device:
- if the <u>single</u> flag of the packet class of the generated packet is in the first state, changing the <u>single</u> flag of the packet class of the generated packet to the second state.
- (Currently Amended) A method for use in verification of a device comprising: providing a plurality of packet classes;
- providing a <u>single</u> flag, which may be of a first or a second state, for each of the plurality of packet classes;

generating a packet;

- if the <u>single</u> flag of the packet class of the generated packet is in the first state, testing the device:
- if the <u>single</u> flag of the packet class of the generated packet is in the second state, not testing the device.
- (Currently Amended) A method for use in verification of a device comprising: providing a plurality of packet classes;
- providing a <u>single</u> flag, which may be of a first or a second state, for each of the plurality of packet classes;

generating a packet;

if the <u>single</u> flag of the packet class of the generated packet is in the second state, not testing the device.

- (Currently Amended) A method for use in verification of a device comprising: (a) providing a plurality of packet classes;
 - (b) providing a[[n]] <u>single</u> injection flag, which may be of a first or a second state, for each of the plurality of packet classes;
 - (c) generating a packet;
 - (d) if the <u>single</u> injection flag of the packet class of the generated packet is in the second state, not testing the device;
 - (e) if the <u>single</u> injection flag of the packet class of the generated packet is in the first state, testing the device and setting the <u>single</u> injection flag of the packet class of the generated packet to the second state.
- 6. (Original) The method of claim 5 and further comprising repeating steps (c) through (e) thereof.
